Thanh Khê District, Đà Nẵng City, Việt Nam

Skills

Programming Language

Python, Javascript

Frontend

VueJS

Backend

Python with FastAPI

Project Management

Trello, Jira

AI

Tensorflow, Pytorch, Scikit-learn, Numpy, Pandas.

Awards

2023

Top 2 Competition to Optimize Power Use with AI & Data Science DEVDAY 2023

2020

Top 10 VIETNAM ONLINE HACKATHON 2020

Education

Da Nang University of Science and Technology

2019 - 2023

Engineer Degree of Information & Technology

Major: Artificial Intelligence & Data Science

Le Quy Don High School for the Gifted-Danang

2016 - 2019

Major: Physics

Projects

Audio Podcast Summarization

04/2023 - 07/2023

NLP

Personal Capstone Project at University: Data preprocessing with Numpy, Pandas, VnCoreNLP, building text classification and summarization models with Tensorflow, PyTorch and Sentence Transformers.

Power Consumption Forecasting

03/2023 - 04/2023

Timeseries

Teamwork Project for DEVDAY Competition: Data preprocessing with Numpy, Pandas, data visualization using Seaborn, Plotly & building models to predict power consumption and generation with Pytorch.

Medical Image Classification

01/2023 - 03/2023

Computer Vision

Personal Project for Researching: Data preprocessing with Numpy, Pandas, Pillow & building a model with PyTorch to classify cancer risk (BIRADS) in XRay mammogram images.

Content based StackOverFlow search engine

10/2022 - 12/2022

NLP

Teamwork Project Based Learning at University: Data preprocessing with Numpy, Pandas, NLTK, data visualization using Seaborn and building a model using PyTorch and Sentence Transformers.

Airbnb Reviews Sentiment Analysis

11/2022 - 12/2022

NLP

Personal Project for the end of the NLP course at University: Data preprocessing with Numpy, Pandas, NLTK, data visualization using Seaborn and building sentiment classification models for user comments on Airbnb using Tensorflow.

Work Experience

July, 2023 AI Intern at TAS Design Group in Japan

Feb - Mar, 2023 AI Intern at Halovi - Software Development Company
